

Wastewater Trend Analysis Report: SARS-CoV-2 Detection by N1 and N2 RT-qPCR

Public Health
Agency of Canada

Agence de la santé
publique du Canada

Longitudinal data ending 2022-03-17

The graphs show the concentration (copies/mL) of the SARS-CoV-2 N1 and N2 genes in wastewater samples from different sites using RT-qPCR. N1 (green) and N2 (blue) are reported for a one year period with lines representing the 7-day rolling average. The orange line represents the limit of quantification of the assay.

Winnipeg

● N1 ● N2 — N1: 7 day rolling avg — N2: 7 day rolling avg
