

Critical Incidents Reported to Manitoba Health

Period: January 01, 2023 - March 31, 2023

Fiscal Year Occurred	Degree of Injury	Description
2022/23	Death	A patient presented with an acute medical condition. While immediate interventions and consultations were provided, there was a delay in transfer to a higher level of care.
2022/23	Death	Client experienced deterioration in health while in care.
2022/23	Major	A client experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized.
2022/23	Major	A patient experienced a delay in diagnosis and treatment of an acute medical condition.
2022/23	Death	Patient presented to emergency department and experienced a delay in treatment.
2022/23	Major	A resident experienced a change in their medical condition. The opportunity for earlier recognition and intervention was not realized.
2022/23	Major	A client experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized
2022/23	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Early opportunities to provide intervention were not consistently realized.
2022/23	Death	The opportunity to activate all client follow up protocols was not realized and led to a delay in recognition and response to their medical condition.
2022/23	Major	A gap in services resulted in a client's change of their health status and unplanned admission to hospital.
2022/23	Death	An unexpected Cardiac and/or Respiratory Arrest requiring ACLS intervention
2022/23	Major	A patient experienced skin breakdown that progressed into a serious pressure injury.
2022/23	Major	A patient was brought in to emergency department with a fracture whose condition worsened due to transfer delay and communication breakdown
2022/23	Death	Delay in treatment resulted in unplanned admission to hospital.
2022/23	Major	A patient's underlying medical condition worsened. Early opportunities to intervene were not realized.
2022/23	Major	A client experienced skin tissue breakdown requiring increased care and intervention. Early opportunities to provide intervention were not consistently realized.
2022/23	Major	A resident experienced a change in their medical condition. The opportunity for earlier recognition and intervention was not realized.
2022/23	Major	A resident experienced skin tissue breakdown requiring increased care and intervention. Early opportunities to provide intervention were not consistently realized.
2022/23	Death	A patient was found unresponsive, with a suspected suicide attempt. Resuscitation attempts were unsuccessful.
2022/23	Major	A patient developed skin breakdown requiring increased care and intervention.
2022/23	Major	A patient developed skin breakdown requiring increased care and intervention.
2022/23	Major	Patient experienced delay in recognition, assessment, intervention, and transfer for an evolving neurologic event.
2022/23	Death	The patient experienced a clinical deterioration resulting in death. An opportunity for early recognition and intervention was not recognized.
2022/23	Major	Client experienced unexpected clinical deterioration.
2022/23	Death	A patient experienced acute deterioration as a result of a medical device failure.
2022/23	Major	A patient experienced an acute change in their condition that was recognized; however, the opportunity for earlier consultation and treatment was not realized.
2022/23	Major	A patient experienced severe harm requiring intervention while in care, resulting in loss of function. Earlier opportunities to intervene were not recognized.
2022/23	Major	A patient experienced skin tissue breakdown. Opportunities to provide earlier intervention were not consistently realized.

Fiscal Year Occurred	Degree of Injury	Description
2022/23	Major	A patient experienced delays in diagnosis and treatment for an acute medical condition.
2022/23	Major	A patient in the community experienced a delay in receiving pre-hospital medical care
2022/23	Death	A patient experienced a clinical change resulting in an escalation of care. The opportunity to mitigate the risk was not recognized.
2022/23	Death	An error occurred which led to an equipment malfunction that could not be corrected with available supplies.
2022/23	Major	Client developed a stage 3 pressure injury while in care.
2022/23	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Early opportunities to provide intervention were not consistently realized.
2022/23	Major	A patient experienced skin tissue breakdown. Opportunities to provide earlier assessment and intervention were not consistently realized.
2022/23	Major	A patient experienced skin tissue breakdown requiring increased care and treatment. Early opportunities to provide intervention were not consistently realized.
2022/23	Major	Client misdiagnosis resulted in delay in treatment that extended time in care.

Critical Incidents Reported to Manitoba Health

Period: April 01, 2023 - June 30, 2023

Fiscal Year Occurred	Degree of Injury	Description
2023/24	Major	A patient received an unintended medication resulting in an unplanned admission to hospital.
2023/24	Major	A patient experienced a delay in treatment of an acute medical condition requiring a transfer to a higher level of care.
2023/24	Major	A patient experienced a preventable post-op complication requiring additional intervention
2023/24	Major	Client developed a skin wound that resulted in amputation.
2023/24	Major	Patient experienced a burn from contact with heater.
2023/24	Death	Client fell from transfer device.
2023/24	Major	A patient experienced a change in their health status requiring a higher level of care after not receiving an intended medication.
2023/24	Major	Surgery was performed on the wrong body part.
2023/24	Major	A patient experienced skin tissue breakdown. Opportunities to provide earlier risk assessment and intervention were not consistently realized.
2023/24	Death	Client experienced clinical deterioration while in care.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	A patient experienced a delay in diagnosis and treatment of an acute medical condition requiring a transfer to a higher level of care.
2023/24	Death	Client suicide while in care
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	The patient experienced a complication from the use of a medical device. The patient deteriorated and required a higher level of care.
2023/24	Major	A client experienced a fracture after jumping from a height.
2023/24	Major	A delay in diagnostic imaging resulted in a patient experiencing severe harm
2023/24	Death	Delay in treatment contributed to clinical deterioration requiring emergent surgery.
2023/24	Major	Client developed a stage 3 pressure injury.
2023/24	Death	A patient in the community experienced a delay in receiving pre-hospital medical care.
2023/24	Major	Client developed stage 4 pressure injury while in care.
2023/24	Major	A patient experienced severe harm following a surgical procedure. Opportunities to mitigate risk were not realized.
2023/24	Major	There was a delay in responding to an acute change in the patient's medical condition.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	Client sustained fracture by an unknown mechanism.
2023/24	Death	A patient experienced a clinical deterioration. Opportunities for earlier escalation of care were not realized.
2023/24	Major	A patient experienced an unusual extension of a hospital stay as a result of a medication administration issue.
2023/24	Major	A resident experienced skin/tissue breakdown. Opportunities for earlier intervention were not realized.

Critical Incidents Reported to Manitoba Health

Period: July 01, 2023 - September 30, 2023

Fiscal Year Occurred	Degree of Injury	Description
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention.
2023/24	Major	Incorrect procedure was completed, and a second procedure was required.
2023/24	Major	Incorrect device was used during procedure resulting in extension of hospital stay.
2023/24	Major	Client fall resulted in fracture.
2023/24	Major	Delays in communication of diagnostic imaging results resulted in a loss of opportunity for timely intervention.
2023/24	Major	A patient experienced skin tissue breakdown. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	Client experienced a fall resulting in fracture.
2023/24	Major	A patient inflicted serious self-harm which required an escalation of care.
2023/24	Major	A resident experienced a fall that resulted in a serious outcome.
2023/24	Major	A patient became unresponsive, requiring resuscitation and transfer to a higher level of care.
2023/24	Major	A patient had a fall that resulted in a serious outcome.
2023/24	Major	A patient experienced a change in health status requiring medical intervention after receiving a prescribed medication.
2023/24	Major	A resident experienced an unintended injury requiring intervention and a higher level of care.
2023/24	Major	A patient experienced a delay in transfer for required treatment.
2023/24	Major	Failure to escalate transfer of a critically ill client to more appropriate care facility.
2023/24	Death	There was a delay in recognition and response to a patient's acute medical condition.
2023/24	Major	A resident experienced an injury. Opportunities to mitigate the risk of injury were not fully realized.
2023/24	Major	A resident experienced a fall. Opportunities to mitigate the risk of injury were not fully realized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention.
2023/24	Major	A client experienced skin tissue breakdown. Early opportunities to provide intervention were not consistently realized.
2023/24	Death	Client deterioration during procedure was not recognized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention.
2023/24	Death	A patient experienced an acute change in their medical condition. The opportunity for earlier recognition and intervention was not realized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Early opportunities to provide interventions were not consistently realized.
2023/24	Major	Complication occurred during procedure related to equipment use, resulting in need for a second procedure.
2023/24	Major	Complication occurred during procedure related to equipment use, resulting in need for a second procedure.
2023/24	Major	A patient experienced an acute change in their medical condition. The opportunity for earlier consultation and treatment was not realized.
2023/24	Major	A patient experienced a delay in diagnosis and treatment of an acute medical condition requiring a transfer to a higher level of care.
2023/24	Major	A client experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	Upon retrospective analysis, an abnormality was noted on previous diagnostic imaging. Opportunities for earlier diagnosis and less invasive treatment were missed.
2023/24	Major	A patient experienced a complication of treatment requiring a higher level of care.
2023/24	Major	An opportunity for post procedure follow-up care was missed. The patient experienced serious harm.

Fiscal Year Occurred	Degree of Injury	Description
2023/24	Death	Postponement of an elective surgery resulted in a serious outcome.
2023/24	Death	A patient experienced a clinical deterioration following dislodgement of a medical device.
2023/24	Major	A patient experienced a procedural complication associated with a serious outcome requiring emergent intervention.
2023/24	Major	A resident experienced a change in their medical condition. The opportunity for earlier recognition and intervention was not realized.
2023/24	Major	A patient was admitted to hospital with a respiratory illness. Delay in response to clinical deterioration led to serious harm and the need for a higher level of care.
2023/24	Major	A patient required escalation of care due to an acute deterioration. Opportunities to expedite medical assessment and diagnostic investigations were not realized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier intervention were not consistently realized.
2023/24	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Opportunities to provide earlier assessment and intervention were not realized.
2023/24	Major	A patient experienced a fall that resulted in a serious outcome.
2023/24	Major	A patient required re-admission and escalation of care. Opportunities for earlier diagnosis and intervention during the initial hospital stay were not realized.
2023/24	Major	Appropriate process for complex case was not followed, negatively impacting treatment plan and leading to extension of hospital stay.
2023/24	Major	Inaccurate interpretation of diagnostic imaging resulted in a missed opportunity for non-surgical intervention.
2023/24	Major	There were missed opportunities to mitigate a patient's risk of developing a known post-operative complication. The patient required re-admission to hospital.
2023/24	Major	Treatment plan did not align with changes in client status resulting in an extension of hospital stay.
2023/24	Major	All opportunities to mitigate risks associated with a treatment were not realized. The patient experienced a serious outcome.
