

## Critical Incidents Reported to Manitoba Health

Period: October 01, 2022 - December 31, 2022

Fiscal Year Occurred	Degree of Injury	Description
2022/23	Major	A patient experienced an unintended event during a surgical procedure resulting in a serious outcome.
2022/23	Death	A patient died from receiving an antidote treatment above the maximum dosage for a suspected overdose.
2022/23	Death	Client found partially on floor beside bed.
2022/23	Death	A patient with an acute medical condition experienced a change in status, gaps in monitoring may have led to delayed recognition and response to clinical deterioration.
2022/23	Death	Deterioration in client health status prior to transport to a more appropriate care facility.
2022/23	Major	A patient experienced a pressure injury associated with the use of a medical device.
2022/23	Major	A patient experienced delays in diagnosis and treatment for an acute medical condition.
2022/23	Major	Patient fall resulting in a fracture.
2022/23	Major	A patient presented with an acute medical condition. While immediate interventions were provided, early opportunities for appropriate consultation and further treatment were not consistently realized.
2022/23	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Early opportunities to provide intervention were not consistently realized.
2022/23	Major	Patient developed an Unstageable Pressure Injury while an inpatient on a mixed bed Acute Care unit.
2022/23	Minor	A minimally invasive procedure was completed on an incorrect patient, requiring diagnostic testing to rule out harm.
2022/23	Major	Post-operative patient presented to an emergency department twice over a short period of time. A procedure was performed each visit which may have contributed to worsening condition.
2022/23	Death	A patient experienced a change in their medical condition. The opportunity for earlier recognition and intervention were not realized.
2022/23	Major	Patient given medication in emergency department for acute pain became unresponsive with complications, requiring transfer to tertiary hospital for stabilization.
2022/23	Major	A client received an unintended medication resulting in an unplanned admission to hospital.
2022/23	Major	Client experienced a delay in care, resulting in infection and hospitalization.
2022/23	Major	Delays in recognition and response to clinical deterioration led to serious harm and the need for a higher level of care.
2022/23	Major	Delay in patient diagnosis/treatment associated with serious harm.
2022/23	Major	Client developed wounds while in care.
2022/23	Major	A patient experienced skin tissue breakdown requiring increased care and intervention. Early opportunities to provide intervention were not consistently realized.
2022/23	Major	A patient was discharged from emergency department and later found unresponsive in the health care facility.
2022/23	Major	Client fell, sustaining a fracture.
2022/23	Major	A patient developed a pressure related injury. Opportunities to provide earlier interventions to mitigate the risk were not fully realized.
2022/23	Major	A patient experienced a delay in diagnosis and treatment of an acute medical condition requiring transfer to a higher level of care.
2022/23	Major	A resident experienced a skin tissue injury requiring transfer to a higher level of care and intervention.
2022/23	Death	Client fell from transfer device.
2022/23	Major	Patient developed an Unstageable Pressure Injury while an inpatient on a mixed bed Acute Care unit.
2022/23	Major	A patient on the medical unit sustained a fall requiring intervention due to the call system disengaging.
2022/23	Major	Client fall resulted in fracture.

2022/23	Major	Client developed Stage 3 pressure injury while in care.
2022/23	Death	Patient under observation in emergency department experienced deterioration of clinical status and delay in care.
2022/23	Major	A patient experienced a delay in treatment of an acute medical condition requiring a transfer to a higher level of care.
2022/23	Major	A patient on an involuntary admission eloped from the health care facility and experienced serious harm. An opportunity for early prevention and discovery of the elopement was not recognized.
2022/23	Death	The patient experienced a clinical deterioration. The opportunity for further assessment and treatment was delayed resulting in transfer to a higher level of care.
2022/23	Major	The patient experienced a clinical deterioration. An opportunity for early intervention was not recognized.
2022/23	Death	The patient experienced a clinical deterioration. An opportunity for early intervention was not recognized.
2022/23	Major	A resident developed a healthcare-acquired infection associated with a serious outcome.
2022/23	Death	Patient experienced a clinical deterioration. Opportunities for earlier intervention were not realized.
2022/23	Major	Fracture was not identified on x-ray resulting in prolonged treatment and recovery.
2022/23	Major	A patient experienced a delay in diagnosis and treatment of an acute medical condition requiring transfer to a higher level of care.
