How to find and attach wire pix to local stories in GPS*

*without downloading/uploading or using Wire Tracker or CP Images.

Why this is useful: CP photos seem to move in GPS long before they show up in "Browse Available Images" on the story you need them for. Attaching photos this way also means you don't have to download them and upload them to the story using Wire Tracker or CP Images.

(Note: if you are looking for older images or want to attach many images such as for a slideshow, cpimages.com might be faster.)

- 1. Copy or make note of the slug of the story you want to attach the photos to.
- 2. In GPS, click "Open" at the top left corner, then select "Wire Tracker". Wire Tracker will open in a new window or browser tab.

3. In Wire Tracker, use the search function to find photos. You can use the shared search called "Photos" to limit your search to only images.

Results will show up on the right. Hover over a camera icon to see a preview of the image.

4. DOUBLE-CLICK on a photo you want to attach to the story. It will open in a new tab or window.

5. Then CLICK ONCE on the image itself. This will open a new window with just a browser box in it.

In the "Link to existing story" field, paste the slug of the story you want to attach the image to. The search will return a list of stories if you know a single word in the slug, but having the exact slug works better.

Click on "Attach" next to the relevant story's slug.

That's it! The image is now attached to the story.

Note: CLOSE THIS WINDOW WHEN YOU'RE DONE or GPS will prevent you from opening another such window for any other images you may want to attach.
